

Hunter x Hunter Jumpchain

By PsychoAnon

“Strange beasts and monsters...”

“Secret treasure hoards, undiscovered wealth...”

“Mystical places, unexplored frontiers...”

“The mysterious unknown...”

...there's magic in such words for those captivated by its spell...

They are called “**Hunters.**”

Welcome to the world of Hunter x Hunter. Here, people called Hunters are formal members of the most respected organization in the world - the Hunter Association. Hunters are explorers, treasure hunters, archaeologists, entomologists, bounty hunters - basically any profession or passion that involves searching for and/or collecting things. Licensed members of the Association are some of the most well paid and revered individuals in the world.

A young boy named Gon Freecss will soon leave his home of Whaletail Island to take the Hunter exam and become a Hunter, not for money or fame but to find his mysterious absentee father Ging. He will cross paths with three others with the same goal of becoming hunters; Kurapika, the last survivor of the Kurta Clan on a quest for vengeance; Leorio, a young man hoping to get rich and become a doctor; and Killua Zoldyck, a child Gon's age born and trained by the infamous Zoldyck assassin family. Their lives will change forever as they dive into the dangerous world of hunters and their mysterious power known as “nen”. What will you do in this world? What adventures and dangers await? That is for you to decide.
